

Hello Orange Class!

I hope you are all enjoying the time at home with your families and are having fun with your home learning! I am spending my time learning the piano and learning to cook new recipes. I am sure you have found fun ways to learn at home. Maybe you are helping to make meals, growing plants, creating interesting inventions out of junk modelling, writing some creative stories or even just helping your adults around the house.

Gary is having a lovely holiday with Natasza and is eating lots of insects. I would like it if you could do some research on insects and write a few facts that you find out for me. You could also draw some interesting insects that you find.

There are lots of ways you could be learning maths at home. I'd like you all to start to find $\frac{1}{2}$ and $\frac{1}{4}$ of different shapes.

Then you can begin to find $\frac{1}{2}$ of a given amount eg What is $\frac{1}{2}$ of 8? Then you can begin to find $\frac{1}{4}$ of a given amount. Eg What is $\frac{1}{4}$ of 8?

This week see if you can help your adults to prepare a simple recipe and have a go at weighing the ingredients, using grams. I would love to see a photo or a drawing of what you make!

Keep up with writing your journal. You can tell me some of the things you are doing at home. Write it down in your book and I will read all about it when you come back to school

Alice
