

Dear Rainbow Class

I am looking forward to seeing you and welcoming you back from Monday 22 June. I cannot wait to hear your news, hear about the things you can do now and what things you have missed. I cannot wait to hear you read and see how brilliantly you have progressed in all your subjects. Home learning will still continue because you will only be in school for two days. Children who are not returning, you will be able to continue to learn from home following our weekly home learning grid. I will still keep in touch with you.

This week, Monia, Gozde and I will be getting the classroom ready. Some of the furniture will be moved out so that we have more space. Also, we will be creating boxes so that Pod A has their own resources and Pod B have their own resources. We will have some new rules so that everyone keeps safe and happy. We will still be able to have PE, Music, Quiet Reading, Science, Art and of course Literacy and Numeracy but we will need to stay within our classroom and allocated playing space. I will tell you more when I see you.

We are still Rainbow Class! Each of you make up Rainbow Class and even though we will be in two Pods we will still continue to learn lots and have fun.

See you soon.
Love Amanda xx

Bonjour Rainbows

I hope you are all well. This week, I have continued to help Yuen with his homework and my long time friend to perfect his French. Yuen and I have decided to carry on with Joe wicks. We are doing a small work out every day. Thus week I have tried some recipes with recycled coffee grounds as it has very good properties. So far, I have made a face mask, a body scrub and an eye mask. Also, we went out for a walk to get some fresh air and spotted some beautiful, colourful flowers.

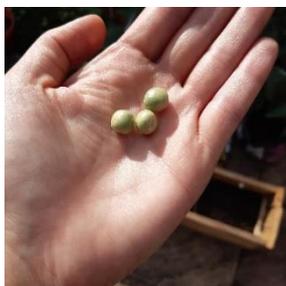

I helped Yuen with his Lego flying project by listening to what he needed, providing it for him and supporting him so that his project was successful. We used proper Aluminium balloons as they stay longer in the air and helium. We estimated how many balloons we would need to make the Lego ship fly. My estimate was 10-12 and Yuen's estimate was 6-8. In fact to make the small Lego ship fly we actually used 18 helium filled balloons! It was a fun and interesting project!

I am looking forward to see you soon. Keep smiling and having fun. Bisous, bisous Monia xxx

Hello Rainbows,

Hope you are well and keeping busy! I have visited our school on Friday and saw some friends from different classes. Keeping our distance, we had a quick chat and it felt really good!

This week, I have collected the peas. It is a lovely thing to eat something you grow! I also made bread for the first-time using sourdough which is an active yeast that I started myself at home. Yeast is a tiny little living thing that can be found everywhere around us. There are different kinds of yeast and some are used in baking. The sourdough I made is smelly, but the smellier it gets, the yummiier your bread is!

I miss experimenting with you Rainbows. I hope you find opportunities to do your own experiments at home.

Lots of love,
Gozde
