

Hi Red Class

We hope everyone is keeping busy at home – it is very strange not being able to go to school to see you all!

We have both been busy doing some school work with our own children, gardening, cooking, and doing Joe Wick's workout every morning!
Have any of you been joining in with that?

Here are some things we would like you to do over the next few weeks:

- Joe Wicks workout (you can find this on YouTube)
- Keep a diary of the things you have been doing every day
- Make your own story book
- Write out recipes of something you've cooked and we can make a red class recipe book when we're back at school
- Draw, paint or photograph signs of spring
- Book review of something you've been reading at home. Make sure you include the name of the book, author, and who were the main characters? What was the best part of the story? A picture of your favourite part would be good, too.
- For maths, find 2D and 3D shapes around your home. Can you count the faces, edges and vertices (corners) Are they straight or curved? With 3d shapes; how many faces? How many edges? How many vertices? What are the most common shapes that you can find in your home? Why do you think that is?
Don't forget to count forwards and backwards in 2s, 3s, 5s and 10s. See if you can help you parents to do some cooking that involves lots of maths, measuring, time etc.
- Can you plant something that will grow now it's spring (only if you already have seeds at home)
- Look at 2code on the computer (purple mash). You should all try the air traffic control and see how far you can get. I will be setting up activities for you and will be able to see you work soon.

We hope you're all staying well, and hope to see you soon.

From Becca and Christina
